

FACEBOOK, INSTAGRAM, EMAIL, TIKTOK Is Your Account Really Secure?

01

STRENGTHEN YOUR PASSWORDS.

Think your password is secure? Time to check! Avoid easy-to-guess words and instead use a mix of letters, numbers, and symbols for stronger protection.

02

DON'T REUSE PASSWORDS.

Using the same password for all your accounts is risky if one gets hacked, the rest are exposed.

03

ENABLE 2-STEP LOGIN.

Turn on two-factor authentication for all your accounts. Even if someone steals your password, this extra layer keeps your account safe.

04

DON'T SAVE PASSWORDS ON YOUR DEVICE.

It may be convenient, but it also makes it easier for others to access your accounts.

05

AVOID PUBLIC COMPUTERS.

Never log in to your social accounts on public devices. If you must, always log out completely when finished.

06

CHANGE PASSWORDS REGULARLY.

Make it a habit to update your passwords every 1–2 months to reduce risks.
